

Our Learning update...

November 2020

The children were introduced to a beautiful story about a young squirrel who accuses his friends of stealing leaves from his tree during Autumn. However it turned out that the wind was the leaf thief. During playtime in the park, the children independently collected leaves to keep them safe from the leaf thief. We were delighted at how well the children engaged with the story.

On a visit to our allotment some of the children picked a pumpkin which they then helped to scoop out the flesh and design the face. We will re plant some of the seeds at our allotment for next year.

MUD KITCHEN

All the children had the opportunity to have fun, get dirty and explore different natural materials - compost, water, acorns, conkers, sticks, pine cones and leaves to make their own recipes.

Hibernation

We have been thinking about the animals that hibernate including hedgehogs. All the children made their own clay hedgehog to take home to hibernate.

Show & Tell

The children as a group have been taking it in turns to name items collected in pre-school of the same colour - **Green, Yellow, Orange and Black.**

help them understand why we were doing it.

We enjoyed listening to the children share their experiences of fireworks as they created beautiful printed firework pictures. As part of this we talked about safety and the importance of **'Never Ever Play with Matches'**

Remembrance

The children were introduced to the Poppy and the significance of it, that we remember the soldiers that died to keep us safe.

Our home corner was converted into a bunker so in small groups children with a teacher could play with related resources - soldiers, army vehicles and horses.

We were extremely proud of those children that joined the teachers to observe the two minute silence. The children were given a soldier to hold to help them focus and to
